

[U.S. Viking, LLC](#)

US VIKING LLC

U.S. Viking's primary product is ENPS, a Newsroom Computer System marketed by the Associated Press. ENPS provides a single system for news organizations allowing staff access from the field or at the office in order to create content for broadcast or digital platforms.

Journalists in more than 800 newsrooms in over 60 countries, including ESPN and the BBC depend on ENPS. The U.S. Viking software enables fluid collaboration of newsroom staff to reliably put shows on the air with unrivaled levels of efficiency not possible with any other technology.

Key Customers: include journalists in more than 800 newsrooms in over 60 countries, including ESPN and the BBC, that use ENPS.
